

iBike® Owner Upgrade Program

GENERATION II brought you...increased accuracy and vibration resistance nearly 4 times that of the original iBike® Pro. The radical improvements in the iBike's performance in high-vibration situations such as rough-roads and fast down hills eliminates the "false watts" caused by road vibration that sometimes happens in GEN I iBikes.

Introducing GENERATION III...almost more revolutionary than evolutionary.

The completely redesigned iBike Aero III and iBike Pro III includes all of the innovations of Gen II, is even easier to control, and packed with even more power:

- More powerful microprocessor for additional features and greater accuracy
- Improved on-the-bike accuracy, comparable to power meters costing thousands more
- One-touch control ring on the bottom for easier reach and control
- 30% more ride memory
- Improved mounting system for better lock-in
- On-the-bike storage of two profiles
- Easier, faster guided calibration and auto-correction of tilt calibration
- Superior water resistance
- New lap-timer feature
- Improved on-the-bike hill slope accuracy and temperature change performance of sensors

Upgrade you iBike today!

UPGRADE OPTIONS

▪ GEN I to GEN III

iBike GEN I owners who upgrade to GEN III will receive will receive a new GEN III computer (in your choice of black or white) and a CD containing the latest iBike firmware, iBike2 software and installation and usage instructions.

Own an iBike Pro I with cadence?

Now's a great time to fully upgrade! For only \$70 more you can own the iAero III!

- iPro GEN I to iPro GEN III: \$229 [order now](#)
- iPro GEN I to iAero* GEN III: \$299 [order now](#)

NOTE:

- iPro GEN II to iPro GEN III: \$169 [order now](#)
- iAero GEN II to iAero GEN III: \$229 [order now](#)

How the Upgrade Program Works

1) Find out what Generation iBike you have.

Use the iBike2 ride analysis software to identify which generation iBike that you own.

To determine which generation iBike Pro you own simply **check the serial number** :

- **GEN I:** Power meters will have a serial number in the format of xx xx xx 04 xx xx... (where x are numbers).
- **GEN II:** Power meters will have a serial number in the format of xx xx xx 05 xx xx...
- **GEN III:** Power meters will have a serial number in the format of xx xx xx 06 xx xx...

2) Order the iBike upgrade that you want from the [iBike Store](#).

3) After ordering your upgrade, send us an email showing proof of your iBike's serial number.

Provide proof of serial number by sending:

- A screen shot from iBike2 that shows your serial number AND
- Your serial number copy-pasted into your e-mail

Send proof of serial number to: Upgrade@velocomp.com

4) We will verify your serial number to make sure it is correct and has not previously been used for an upgrade.

NOTE: All iBike serial numbers are unique. Only one GEN III upgrade is permitted for each serial number.

5) After verifying your serial number we will ship you your Gen III iBike.

6) GEN I OWNERS ONLY: After receiving your GEN III unite, please return your GEN I iBike to:

Velocomp/iBike
4931 North Dixie Highway
Boca Raton, FL 33431
info@velocomp.com

Upgrade FAQ

1. How do I know which generation iBike I own?

To determine which generation iBike Pro you own simply check the serial number (use the iBike 2 software to find your serial number).

- a. **GEN I:** Power meters will have a serial number in the format of xx xx xx 04 xx xx...(where x are numbers).
- b. **GEN II:** Power meters will have a serial number in the format of xx xx xx 05 xx xx...
- c. **GEN III:** Power meters will have a serial number in the format of xx xx xx 06 xx xx...

2. What do I get with my upgrade?

- You will receive a GEN III iBike computer head (iPro or iAero, depending on the model you purchased), a battery, and a CD containing installation and usage instructions for the latest iBike firmware, iBike2 ride analysis software, and installation and usage instructions.

3. What if I previously purchased *iBike Trainer* (Indoor/Outdoor) or *iBike G* (Garmin compatibility) firmware upgrades for my original GEN I or GEN II iBike?

- a. If you have either the *iBike Trainer* or the *iBike G* features loaded into your old iBike, we'll add those features into your Gen III unit at no charge. After you receive your GEN III iBike send us the serial number of your GEN III iBike and we'll email the "unlock keys" right away!

4. When I upgrade, do I get to keep my old iBike?

- a. **No** – if you own a **GEN I** iBike and are upgrading to GEN III. If you own a GEN I iBike you will need to return your GEN I iBike to Velocomp after you receive your new GEN III iBike.
- b. **Yes** – if you own a **GEN II** iBike and are upgrading to GEN III.

5. I purchased a used iBike, can I upgrade it to GEN III?

Maybe.

- Yes -- if your iBike serial number has not been used previously for a GEN III upgrade.
- No -- if your iBike serial number has already been used for an upgrade.

We check all serial numbers submitted for the upgrade program. If your serial number has been used previously, then we will notify you and refund the purchase price of the upgrade you have ordered.
