

Velocomp Announces Quarq CinQo Compatibility

Ennis, MT (March 13, 2008) -- Velocomp LLP, makers of the iBike® Pro power meter, announced today new firmware and iBike 2 software that allows any wireless iBike system to receive, record, and display power data from the new Quarq CinQo crank-based power sensor.

"For cyclists who prefer direct-force power measurement, the iBike and CinQo work hand-in-hand to provide a lightweight, precise, and very cost-effective solution." said John Hamann, CEO of Velocomp LLP. "Along with the CinQo's crank-based power data, the cyclist also has access to the full spectrum of iBike data, including hill slope, wind speed, bike speed, cadence, heart rate, elevation, and more. Also, iBike and CinQo data together make it possible to add exciting new features which we will be announcing soon".

This new compatibility is created by the ANT+Sport network, which allows devices from different manufacturers (like the Quarq CinQo and the wireless iBike) to operate together.

"We are very excited to work with iBike. The CinQo and iBike as a pair is a powerful combination and will open new doors in bicycle data", said Jim Meyer, CEO of Quarq, "It is really simple to set up and use the iBike to receive CinQo power data, and the iBike 2 software is a very powerful analysis tool."

The iBike software and firmware which is required to enable CinQo compatibility is free and will be available soon on the iBike website www.ibikesports.com or at the Quarq website www.quarq.us

About Velocomp, LLP

Velocomp, LLP is a sports technology company based in Ennis, Montana. The first in the bicycle industry to deliver advanced power measurement at a mainstream price, Velocomp is dedicated to product breakthroughs in the areas of performance, measurement, design and value. Launched in June 2006, thousands of iBike Pro power meters are being enjoyed worldwide. www.iBikeSports.com.

About Quarq Technology

The CinQo power sensor is a new product of Quarq Technology. Quarq Technology, formed in 2006, is based in Spearfish, SD. www.quarq.us

About ANT+Sport

ANT+Sport is a product of ANT™ - a division of Dynastream Innovations Inc., Cochrane, Alberta, Canada. Dynastream is a wholly owned subsidiary of Garmin International. www.thisisant.com
